

# Annual Listing of Obligated Projects

Eastern Shore Metropolitan Planning Organization (MPO)

FY 2025

**Disclaimer**

The preparation of this report has been financed in part through grant[s] from the Federal Highway Administration and Federal Transit Administration, U.S. Department of Transportation, under the State Planning and Research Program, Section 505 [or Metropolitan Planning Program, Section 104(f)] of Title 23, U.S. Code. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

**Title VI Statement**

The Eastern Shore Metropolitan Planning Organization (MPO) is committed to compliance with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987, and all related rules and statutes. The Eastern Shore MPO assures that no person or group(s) of persons shall, on the grounds of race, color, age, disability, national origin, gender, or income status, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under all programs, services, or activities administered by the MPO, whether those programs and activities are federally funded or not. It is also the policy of the MPO to ensure that all its programs, policies, and other activities do not have disproportionate adverse effects on minority and low-income populations. Additionally, the MPO will provide meaningful access to services for persons with Limited English Proficiency.

**Eastern Shore MPO**

### **Background**

In accordance with the provisions set forth in the current federal transportation law – the Infrastructure Investment and Jobs Act – and 23 U.S.C. 134 and 49 U.S.C. 5303, the Eastern Shore MPO is tasked with carrying out a cooperative and comprehensive multimodal transportation planning process in Baldwin County. Federal transportation law requires that a U.S. Census-designated Urbanized Area be represented by an MPO, which is responsible for ensuring that federal highway and transit dollars are committed through a locally driven, comprehensive planning process.

### **Purpose**

The Transportation Improvement Program (TIP) serves as the four-year capital program of transportation projects that are wholly or partially paid for with funding from the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA). To ensure that the public has an accurate understanding of how federal funds are spent on transportation projects, the FAST Act includes a requirement that the organizations responsible for approving the TIP publish an Annual Listing of Obligated Projects for the most recently completed fiscal year. This report covers federal obligations for FY 2025.

The TIP lists the intended schedule and estimated cost for each phase of a transportation project. Project schedules and costs change on a routine basis, usually as the result of resource availability, timing of work, or the refinement of a project's scope. The TIP, though updated to reflect current project schedules and costs prior to obligating phases, does not provide accounting-level precision of actual, day-to-day project costs and schedules.

### **What are project obligations?**

One might think of this as setting up a checking account for a purchase and then making an initial deposit. In order to begin work on any phase of a transportation project, federal funds must be obligated. This means that money is set aside for that particular project (deposited in the "checking account" for the project), which can then be used to pay bills. The project expenses may cover invoices from a design consultant, a construction contractor, or payroll costs for agency employees working on the project.

### **Do project obligations mean the work is underway?**

No, not always. Project obligations are made to allow a project phase to begin, but it takes time to get work underway once the phase is obligated. For example, once the construction phase is obligated, the project can then be advertised for bids. The advertisement period can vary depending on the size and complexity of the project (up to five weeks in some cases). Bids are then opened, evaluated and the project awarded to a contractor. This process can create a three to four-month lag between initial obligation and noticeable work performed by the contractor at the site.

There are instances when a project phase is obligated, but work is never started or not completed in a timely manner. If there is a question on the status of a specific project, the project sponsor should be contacted.

## ***Annual Listing of Obligated Projects Fiscal Year 2025***

---

### **Project Listing**

The following table list projects that had federal funds obligated during FY 2025 (October 1, 2024 – September 30, 2025) and is sorted by project sponsor. The table includes both FHWA funded projects and FTA funded projects, and includes basic data about each project:

- Program: The Federal Aid program used to fund the project.
- Table Number (Table No.): This is the location of the project based on project type and funding.
- Federal Aid Number (FA Nbr.): Number assigned to the project based on the Federal Aid program used to fund the project.
- Project Number: Assigned by the state DOT to identify and track the project. Each phase of the project has its own project number.
- Scope: This describes the phase or type of work to be performed and for which funding was obligated. Only those phases that had funds obligated during the FFY are listed. Below are phases included in the table:
  1. Preliminary Engineering
  2. Right of Way (ROW)
  3. Utilities (UT)
  4. Construction (CN)
  5. For Maintenance (FM)
- Length: The linear distance of the project measured in miles.
- Start Date: Date work is expected to start or did begin.
- Type of Work: Description of the improvements or work to be completed
- % Engineers Estimate: Project cost estimate

- Federal Obligated: Amount of federal dollars obligated to the project
- Federal Expenditure: Amount of federal dollars spent to date on the project.
- Balance: Amount of federal dollars remaining in the budget for the project

Please note that FTA funded projects do not identify individual phases as shown for FHWA funded projects; transit agencies tend to use funds to purchase capital equipment and do not use the funds to build infrastructure projects, as done with the highway program.

### **Summary**

For FY2025, \$23,771,1040.00 in federal transportation funds were obligated for a variety of State, County, and local transportation projects. This included \$1,715,791.00 in FTA 5307/5340 urban area transit funds for transit projects.
